

Tarber Smoke Master

Tarber smoke generators

Tarber smoke Master liquid smoke generators

Tarber Smoke Master liquid smoke generators are an economical and fire-safe solution that helps you to dispense the correct amount of smoke for whatever food you're smoking. If you're looking for a safe, easy and environmentally friendly smoking method, contact us to find out more.

Tarber Smoke Master - The absolute peak of liquid smoke technology

Over 30 years of investment into technological research and development has made the Swedish-manufactured Tarber Smoke Master generators the world's most advanced and reliable liquid smoking systems. Tarber Smoke Master generators use pressurized air to turn liquid smoke condensate back into its smoke form. The smoke is very light and airy, which guarantees an even smoke. The generators can be installed in or retrofitted to all smoking cabinets available on the market.

Tarber and other maintenance services

Service manager Jarmo Jääskeläinen installs and services Tarber Smoke Master liquid smoke generators. In addition, Jarmo also maintains and installs smoking cabinets and upgrades cabinets' control units.
