

# Barentz.

Enrich meals with essential nutrients, better taste, and targeted health support

- Nutrient boost (immune, brain, gut health & nervous system)
- Palatability enhancement
- Targeted health support
- Variety and enrichment

Boost every meal with purpose

## PetPlate Plus

This is a concept with many recipe varieties. It is meant to be used as a base to identify a customer's best solution.

### Concept description

Meal boosters—also known as meal toppers or food enhancers—are effective nutritional supplements designed to enhance pet food by improving palatability, providing additional nutrients, and supporting specific health requirements.

These boosters can enrich the diet with essential vitamins such as **Vitamin A Palmitate 250 FP CWD**, **Vitamin E 500 BG**, **Vitamin B12 0.1% SD** and **Driphorm® HiDHA® 360**.

In addition to boosting flavour and variety, they help increase hydration and overall dietary appeal, making them ideal for managing picky eaters and promoting optimal pet health.

### Formulation guidelines

Ingredient	Immune, Nervous system	Gut Health	Brain
Chicken Liver Powder	99.987%	99.602%	99.956%
Vitamin A Palmitate 250 FP CWD	0.0027%	-	-
Vitamin E 500 BG	0.0080%	-	-
Vitamin B12 0.1% SD	0.0020%	-	-
Fructooligosaccharides (FOS-P95S)	-	0.398%	-
Driphorm® HiDHA® 360	-	-	0.0436%
Total	100%	100%	100%
